

Project Design Phase-I Solution Architecture

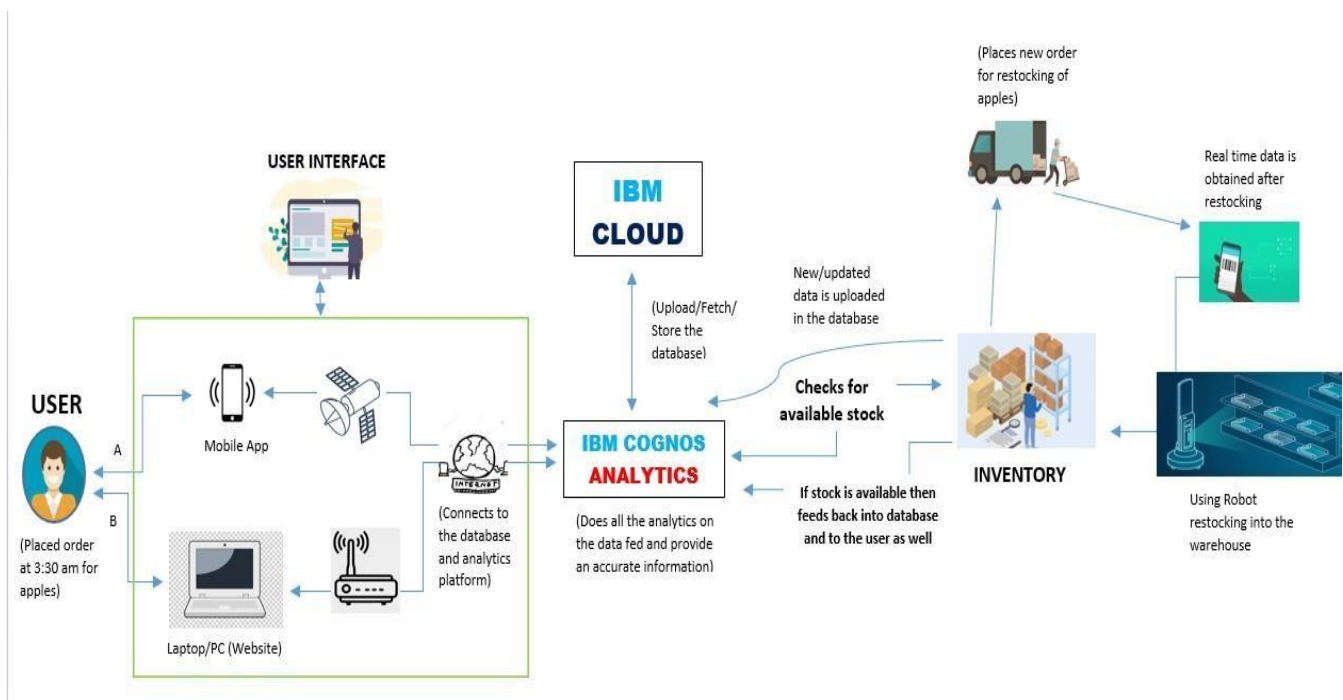

Date	14 October 2022
Team ID	PNT2022TMID01070
Project Name	Retail Stock Inventory Analysis

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- 1) Find the best tech solution to solve existing business problems.
- 2) Describe the structure, characteristics, behaviors, and other aspects of the software to project stakeholders.
- 3) Define features, development phases, and solution requirements.
- 4) Provide specifications according to which the solution is defined, managed, and delivered.
